	Particulars of any issued shares held in trust for the Company or donated for treasury purposes.	Nil.
	Details of any treasury shares (or shares issued subject to payment or shares held for the benefit of the treasury) now under option or the subject of any underwriting or sales agreement. If none, this to be stated.	Nil.
í	Details of any shares pooled, deposited in escrow, non-transferable or held under any syndicate agreement or control.	Nil.
14.	Date of last annual meeting.	June 19th, 1939.
15.]	Date of last report to share- holders.	Annual report for year ending March 31st, 1939, mailed to shareholders May 31st, 1939.
8	Details of any registration with, or approval or authority for sale granted by, a Securities Commission or corresponding Government body.	Nil—None required.
t 2 1 1	Has any application for registration with, or approval or authority for sale by, a Securities Commission or corresponding Government body ever been refused, cancelled or revoked? If so, give particulars.	Nil.
1	Particulars of any bonds, notes, mortgages, charges, liens, or hypothecations outstanding.	Nil. 6% debentures due May 15, 1942, were redeemed during 1939.

10	Names and addresses of all	Chartered Trust and Executor Company,
17.	transfer agents.	34 King Street West, Toronto, Ontario.
20.	Particulars of any fee charged upon transfers other than customary government taxes.	A fee of 25c is charged for each share certificate issued by the company on the transfer of shares.
21.	Names and addresses of all registrars.	Chartered Trust and Executor Company, 34 King Street West, Toronto, Ontario.
22.	Are any lawsuits pending against the Company or any of its properties, or are there any other circumstances which might affect the Company's position or title adversely? If so, explain fully.	No.
23.	Enumerate fully:	
	(a) Properties owned where titles vested in Company.	The company owns patented mining claims T.R.S.823, T.R.S.826, H.R.941, H.R.944, H.R.1001, H.R.1002, P.7969 and P.7970 Delore Township, District of Cochrane, Ontario, in fee, free of encumbrance subject to certain transmission line rights of-way and reservations of railway rights-of-way.
	(b) Properties leased.	Nil.
	(c) Properties otherwise held.	The company has a water pump house site of 0.59 acres on part of mining claims P.9855 and P.13935 in said Township of Deloro covered by License of Occupation No. 4231 and a water pipeline right-of-way under Order of the Mining Court of Ontario across sundry mining claims.
	Give particulars of title held by the Company in each instance, (e. g. patented, unpatented, Crown granted, held un- der mining license, per- petual lease, etc.)	
24.	Full particulars of any royalties or other charges payable upon production from each individual property.	Nil.
25.	Describe plant and equipment on property.	Complete mining and flotation cyanide milling plant. Capacity 320 tons per day, together with the usual shops, offices and a number of residences.

26. Describe development accomplished and planned.	Main 3-compartment shaft completed to 1,500 ft. with development of ore bodies to 1,000 ft. adjacent thereto on two claims. Extension of this development work and development of lower levels planned for the future.
27. Date and author of mining engineer's or petroleum geologist's report filed with this application and available for inspection on request.	Reports by John Beattie, Mining Engineer, dated April 27th, 1939, and February 24th, 1940. (See pages 6 and 8).
28. Full particulars of production.	From commencement of milling June 1, 1937 to December 31, 1939—235,961 tons milled—value \$1,716,353.01.
29. Have any dividends been paid? If so, give dates and amounts.	Dividend No. 1 (interim) of 3c per share or a total of \$89,363.01 was declared by the directors January 30th, 1940, payable in Canadian funds April 30th, 1940, to shareholders of record April 2nd, 1940.
30. Name and address of the solicitor or attorney whose certificate as to titles and to the fact that there are no encumbrances or tax arrears has been filed with the Exchange.	Holden, Murdoch, Walton, Finlay & Robinson, 603 Royal Bank Building, 2-8 King Street East, Toronto, Ontario.
31. Name and address of the solicitor or attorney whose certificate as to the legality of the incorporation and organization of the company, the validity of its shares and the fact that they are fully paid and non-assessable has been filed with the Exchange.	Holden, Murdoch, Walton, Finlay & Robinson, 603 Royal Bank Building, 2-8 King Street East, Toronto, Ontario.
32. Has the listing of any shares of the Company ever been refused or deferred on any stock exchange? If so, give particulars.	No.
33. Are any shares of the Company listed on any other stock exchange? If so, give particulars.	No.

Development	20,002	3,144
Stopes	65,657	442
Surface ore dump	6,213	
	91,872	3,586

BROKEN ORE RESERVES

Broken ore reserves are estimated at 37,005 tons at a grade of 0.177 oz. or 3.54 dwts. per ton. All the ore is cleaned up from the surface ore dump.

ADDITIONS TO PLANT BUILDINGS AND EQUIPMENT

Three houses were built for members of the staff.

One set of crushing rolls together with a vibrating screen and the necessary conveying equipment was installed.

All necessary machine shop equipment was purchased and installed temporarily in the hoist and compressor building. A new tailings disposal line was installed and placed in service.

The necessary equipment for an experimental laboratory was installed in the mill.

The 300 kv-a outside transformers were replaced with 500 kv-a transformers.

SUMMARY

Development throughout the year has been very encouraging with 64.2% of all drifting, for a total of 3,384 feet, being in ore at a grade of 3.94 dwts. or 0.197 ounces over 5.9 feet. Diamond drilling has indicated the possibility of other lenses of ore in the main ore zone.

To permit deeper development, a new and larger hoist has been ordered and will be placed in service at the No. 2 shaft in July. The mill tonnage has been gradually increased throughout the year to the present rate of about 300 tons per day. In conclusion I wish to express my appreciation for your guidance and co-operation so freely given, and to thank the

staff and other employees for their loyal support.

Yours respectfully,

"J. BEATTIE,"

Manager's Report on the Property Dated February 24th, 1940

Location:

Delnite Mines, Limited own a group of eight claims with a total of about 300 acres situated in the northern half of Deloro Township about two miles south of the Hollinger, and about due west of the Aunor and Buffalo Ankerite.

Ore Conditions:

The ore zone is a series of lava flows about 250 feet wide, bounded on the north and on the south by a zone of chloritized, and somewhat serpentinized schist. This ore zone strikes a little to the north of east, and on surface outcrops towards the southern end of the property. The dip of the zone is about 60 degrees to the north

In the ore zone are found ore lenses of the quartz tourmaline type having a dip somewhat steeper than the ore zone, and a strike about due east and west. This type has produced the greater portion of ore so far developed. Other breaks which occur in more or less silicified and carbonated zones, strike about parallel to the ore zone, and so far account for a small tonnage of low to medium grade ore.

The main ore lenses so far developed occur over a length of about 800 feet, and to date show a fairly steep pitch downward to the west.

Development Work Done to Date:

The mine is serviced with two shafts: No. 1, the original shaft, has two compartments, and is in the footwall of the ore zone, and bottoms at the 375 foot level. No. 2, the main shaft, has three compartments, and is collared in the hanging wall of the ore zone about 800 feet north of the No. 1 shaft. This shaft is 1,621 feet deep with 1,500 being the lowest level. Both shafts are connected on the 250 and 375 foot levels, and are opened up with levels at 125 foot intervals. Below the bottom level in No. 2 shaft, an ore pocket has been excavated, and the loading equipment installed.

The development work to date has been largely concentrated in the main ore lenses, between surface, down to and including the 1,000 foot level. Some work has been done in the extension to the west, and to the east on these breaks, and some work has been done on the carbonated zones.

Development Work Planned:

The principal development work in the near future will be the opening up of the four new levels. One or more machines will also be kept on the older levels to continue development to the east and west along favourable breaks.

Plant and Equipment:

The surface plant and equipment is capable of handling an estimated 400 tons of ore per day. The mill has recently been changed from straight cyanidation to flotation. The ore is floated following the primary grind, the flotation tails are discarded, and the flotation concentrates are cyanided. This present flow sheet should increase recovery by about 3%.

General:

The mill is handling an average of about 310 tons of ore per day, and may not be increased materially until the ore pass system is completed, and the skips for hoisting ore are installed.

The mine is in quite favourable position as regards ore, and preliminary work done on the lower levels shows the conditions to be similar to that above.

Yours very truly,

"J. BEATTIE,"

Manager.
